How A Few Irresponsible Adults Caused Thousands of Animal Extinctions

April’s Front Range Teen Science Café will feature Dr. Tom Stohlgren from the Natural Resource Ecology Lab at Colorado State University.

From 30,000 years ago to today, it hasn’t been climate change, human population growth, or air and water pollution causing the extinctions of cute, fuzzy, and feathery animals we loved – it’s been a relatively small number of totally irresponsible adults. To be honest, some big, slow, and dumb animals were hunted to extinction too, but I still blame a few adults. I’m a funny, irreverent scientist who wears Hawaiian shirts every day. I’ll take the mystery out this extinction “who-done-it.” I blame a few irresponsible explorers, trained killers, vacationers, pet owners, and shoppers for the global decline in biodiversity!

APRIL 8
WEDNESDAY: 5–7PM
EVERYDAY JOE’S COFFEE HOUSE
144 S. Mason St, Fort Collins, CO

RSVP: http://www.cmmmap.org/scienceEd/scienceCafe/

Food and drinks are provided. Please RSVP so we can plan accordingly.
